

Ahmed Fawzy Biography

Ahmed Fawzy is one of our most dedicated, resilient and inspiring Mashreq employees.

For those who do not know him: Ahmed is a successfully married man & father in his mid-30s who suffers from partial blindness. It is predicted that by age 40 he will have completely lost his sight. Ahmed works as a decision support coordinator for Iraq and Erada Project Lead. He is an inspiration and true role model for accountability, responsibility and business commitment.

His continual optimism and courage despite his circumstances serve as an example to all.

After becoming aware of his partial blindness he came up with several innovative ways to continue his job unaffected by his disability, with the support of the business, namely by integrating cutting-edge text to audio software into Unilever computer systems.

His passion for living life to the full is extended to others as well and he has been integral in the creation of “Erada” a USLP project for the Pharmacy channel which provides job opportunities for visually impaired youth who have limited options in the employment sector.

We hope that Ahmed’s story inspires you and reminds you that perseverance, courage and hope can help overcome even the darkest obstacles.

Ahmed’s moving account of his story (in Arabic) which was printed recently in Al-ahram can be accessed by clicking on the link below.
